

The mission of the Ninemile Wildlife Workgroup is to promote knowledge and stewardship of local wildlife and habitats within the communities and public lands of the Ninemile, Huson, and Alberton Region.

What are some of the Ninemile Wildlife Workgroup’s activities?

- Manage a community bear aware program with neighbors alerted by email about potential problems with bears and mountain lions.
- Sponsor lectures so experts from a broad spectrum of interests can share their knowledge with local citizens.
- Host a Highway Litter Pick up on a 2 mile section of Highway 10 between Nine Mile and Alberton.
- Partner with various organizations and government agencies to effectively foster our mission together. Some of those activities included:
 - Sponsoring the construction of electric fences to keep crops and livestock safe from bears
 - Promoting and procuring bear resistant garbage containers for our area
 - Working on various wildlife surveys and habitat improvement projects
 - Staffing information tables and assisting at local events.
- Keep people informed on a variety of wildlife related topics through brochures, Facebook, and a website.
- Host annual bird walks to highlight some of our avian neighbors.
- Co-sponsor with the Ninemile Community Center the annual apple cider pressing event to emphasize the relationship of home attractants and bear safety.

I’d Like to Help Support the Ninemile Wildlife Workgroup!

You can either click on the donation form on our website www.ninemilewildlife.org

or

Fill out this form and mail it along with your donation (checks only please) to:

Ninemile Wildlife Workgroup
PO Box 183
Frenchtown MT 59834
